

Preparing For Your Site Visit

Measurement Technician will visit your building and collect measurements, photos, and spatial data of each floor. We will use this information to create architectural as-built floor plans, virtual tours, and photos of mechanical, electrical, and plumbing equipment.

Help Us Go Faster & Get Better Results

1. Make Sure Rooms And Closets Are Unlocked And Accessible
2. Clear Any Unnecessary Items That Could Block Important Structural And Architectural Details.
3. Put Away Valuables & Personal Items.
4. Remove Or Hide Sensitive Information.
5. Stay Out Of The Way Of Lidar Camera System.

Important Equipment

We take photos of mechanical, electrical and plumbing equipment inside and outside your building. You can help us locate equipment and prepare it for photographing by clearing a path.

Equipment Includes:

Interior Equipment

1. Electrical Panels
2. Furnace or Boiler
3. Heat Recovery Vent
4. Hot Water Heaters
5. Water Meters
6. Water Softener
7. Sump Pump

Outside Equipment

1. Gas Meter
